Policy 5028
Students**

USE OF PRIVATE TECHNOLOGY DEVICES BY STUDENTS

Students may possess privately-owned technological devices on school property and/or during school sponsored-activities, in accordance with the mandates of this policy and any applicable administrative regulations as may be developed by the Superintendent of Schools.

Definitions

Board Technology Resources

For the purposes of this policy, “Board Technology Resources” refers to the Board’s computers and instructional technologies; communications and data management systems; informational technologies and the Internet; and any other technology resources owned and/or used by the school district and accessible by students.

Privately Owned Technological Devices

For the purposes of this policy, “privately owned technological devices” refers to privately owned desktop computers, personal computing devices, cellular phones, Smartphones, network access devices, radios, personal audio players, CD players, tablets, walkie-talkies, personal gaming systems, Bluetooth speakers, personal data assistants, and other electronic signaling devices.

Use of Privately-Owned Technological Devices

Privately-owned technological devices may not be used during instructional time, except as specifically permitted by instructional staff or unless necessary for a student to access the district’s digital learning platform or otherwise engage in remote learning if remote learning has been authorized in accordance with applicable law.

On school property, at a school-sponsored activity, while in use for a remote learning activity if remote learning has been authorized in accordance with applicable law, or while being used to access or utilize Board technology resources, the use of any such device for an improper purpose is prohibited. Improper purposes include, but are not limited to:

- Sending any form of harassing, threatening, or intimidating message, at any time, to any person (such communications may also be a crime);
- Gaining or seeking to gain unauthorized access to Board technology resources;

- Damaging Board technology resources;
- Accessing or attempting to access any material that is obscene or contains pornography;
- Cyberbullying;
- Using such device to violate any school rule, including the unauthorized recording (photographic, video, or audio) of another individual without the permission of the individual or a school staff member; or
- Taking any action prohibited by any Federal or State law.

Search of Privately Owned Technological Devices

A student's privately owned technological device may be searched if there are reasonable grounds for suspecting that the search will turn up evidence that the student has violated or is violating either the law or the rules of the school. Any such search shall be reasonably related to the objectives of the search and not excessively intrusive in light of the age and sex of the student and the nature of the infraction.

Responsibility for Privately Owned Technological Devices

Students are responsible for the safety and use of their privately owned technological devices. If a privately owned technology device is stolen, lost, or damaged, a report should be made to the building principal, who will investigate the loss in a manner consistent with procedures for stolen or damaged personal property. Students and parents should be aware that the Board is not liable for any privately-owned technological device that is stolen, lost, or damaged while at school or during a school-sponsored activity. For that reason, students are advised not to share or loan their privately-owned technological devices with other students.

Disciplinary Action

Misuse of the Board's technology resources and/or the use of privately-owned technological devices to access or utilize the Board's technology resources in an inappropriate manner or the use of such devices in any manner inconsistent with this policy will not be tolerated and will result in disciplinary action per staff discretion. For students, a violation of this policy may result in loss of access privileges, a prohibition on the use and/or possession of privately-owned technological devices on school property or at school-sponsored activities, and/or suspension or expulsion in accordance with the Board's policies related to student discipline.

Access to Board Technology Resources

It is the policy of the Norfolk Board of Education to permit students, using their privately-owned technology devices, to access the Board's computers and instructional technologies; communications and data management systems; informational technologies and the Internet; and any other technology resources used by the school district and accessible by students. Additionally, it is the expectation of the Board of Education that students who access these resources while using privately-owned technology devices will act at all times appropriately in ways that are fully in accord with applicable policies concerning technology use as well as all local, state, and federal laws.

Through the publication and dissemination of this policy statement and others related to use of the Board's computer systems, as well as other instructional means, the Board educates students about the Board's expectations for technology users.

The Board technology resources shall only be used to access educational information and to promote learning activities both at home and at school. The Board considers access to its technology resources to be a privilege and not a right. Students are expected to act at all times appropriately in ways which are fully in accord with applicable policies concerning technology use as well as all local, state, and federal laws when using the Board technology resources. Failure to do so will result in the consequences outlined herein and in other applicable policies (including, but not limited to, the Safe School Climate Plan, the Student Discipline Policy and the Use of Computers Policy).

Students must abide by the procedures outlined in this policy and all policies and applicable regulations outlined in the Board's computer use and other applicable policies. Students will be given specific information for log-on and access procedures for using school accounts. No user may deviate from these log-on/access procedures. **Students are advised that the Board's network administrators have the capability to identify users and to monitor all privately-owned technological devices while they are logged on to the network.** Students must understand that the Board has reserved the right to conduct monitoring of Board technology resources and can do so *despite* the assignment to individual users of passwords for system security. Any password systems implemented by the Board are designed solely to provide system security from unauthorized users, not to provide privacy to the individual system user. The system's security aspects, message delete function and personal passwords can be bypassed for monitoring purposes. Therefore, students should be aware that they should not have any expectation of personal privacy in the use of privately owned technological devices to access Board technology resources. This provision applies to any and all uses of the Board's technology resources and any privately-owned technological devices that access the same.

Harm to Board Technology Resources

Any act by a student using a privately-owned technological device that harms the Board's technology resources or otherwise interferes with or compromises the integrity of Board technology resources will be considered vandalism and will be subject to discipline and/or appropriate criminal or civil action.

Closed Forum

This policy shall not be construed to establish a public forum or a limited open forum.
